PRP – Human Assessment & Comparison with LLM's results

Key Findings

- High overall alignment (83%) between human and LLM assessments, with an average delta of 17%, indicating generally consistent evaluation patterns.
- LLM occasionally deviates from the prompt, notably by:
    - Mixing criteria (Title_clear vs Title_standalone)
    - Using title/description elements when not required
    - Misapplying scoring rules (/3 penalty)
- In several cases, similar reasoning leads to very different scores, indicating calibration differences rather than analytical gaps.
- The human assessment tends to be stricter and more rule-based while the LLM applies more contextual and interpretive judgment

#########

Introduction

The aim of this document is to analyze the main differences between assessments of text samples conducted by a human and by an LLM (based on the same prompt). To do so, we proceed in 4 steps:

1. We analyzed a set of 10 text samples (randomly selected) using the prompt.
2. We provided Claude with the same 10 text samples and prompt.
3. We went through Claude's results to check whether any elements had been overlooked in the human assessment. When necessary, corrections were made.
4. The remaining differences (significant deltas) between the human assessment and Claude's results were analyzed to identify what the AI may have missed in its analysis.

Claude's chat is available HERE.

On the next following page, you'll find the prompt and ten text samples used for this exercise.

Prompt used

Return the attached ordered list of projects, ranking those according to their readability, on the following scale:

a. Excellent readability: 91% to 100%.
b. Good readability: 75% to 90%.
c. Just readable: 66% to 75%.
d. Difficult to read: 51% to 65%.
e. Cryptic: 0% to 50%.

Use the following weighing criteria:

a. **Desc_EN**: Description is written in English: 25%
b. **Title_EN**: Title is written in English (15%) or is written in another language (0%)
c. **Substantiality**: Title and description altogether give a concrete idea of the project's specific goals, objectives, or activities: 20%
d. **Simplicity**: Both Title and description have a good enough readability for a person with a secondary school degree who do not have English as first language: 10% (note: when the description is not in English, calculate the score then divide it by three, rounding up to the next integer)
e. **Title_clear**: Title should be meaningful and does not contain unexplained acronyms (an acronym is considered explained if it is immediately followed by its full form in parentheses, such as 'Citizen Science (CS)' : 10% (note: when the title is not in English, calculate the score then divide it by three, rounding up to the next integer)
f. **Desc__funding**: Description fields clearly lets understand for which specific purpose funding was allocated: 10% (note: when the description is not in English, calculate the score then divide it by three, rounding up to the next integer)
g. **Title_standalone**: Title makes sense without reading the description: 10% (note: when the title is not in English, calculate the score then divide it by three, rounding up to the next integer)

For each project, provide a score card in the following format, replacing the content in brackets:

- Project: [record number + title_text]
- Desc: [desc_tewt]
- ID: [ID_num]
- [ranking on scale]: [total score]%
    - Desc_EN: [subscore for criterion] out of 25%: [justification]
    - Title_EN: [subscore for criterion] out of 15%: [justification]

- Substantiality: [subscore for criterion] out of 20%: [justification]
- Substantiality: [subscore for criterion] out of 20%: [justification]
- Simplicity: [subscore for criterion] out of 10%: [justification]
- Title_clear: [subscore for criterion] out of 10%: [justification]
- Title_standalone: [subscore for criterion] out of 10%: [justification]

Proceed one project at a time and ask for my feedback at each iteration.

Text Sample 1

HYBRIDLAB - The Hybrid Lab: Creating shared designs in the Metaverse

The Hybrid Lab is a platform for digital collaboration. We want to use current applications of the so-called ‚Metaverse‘ such as the games engine Unreal and 3D-scanning techniques to create a hybr...

Search - Culture and Creativity

	total	human	claude	delta	Comment human	Comment claude
Desc_EN	25	25	25	0%	The description is fully written in English.	Description is clearly written in English.
Title_EN	15	15	15	0%	The title is fully written in English.	Title is written in English.
Substantiality	20	16	13	15%	The title and description complement each other well. Together, they provide a clear understanding of the project’s nature (a platform for digital collaboration) and its activities (creating shared designs in the Metaverse). They also give an initial overview of the project’s objectives (using current Metaverse applications such as the Unreal game engine and 3D scanning techniques to create new solutions).	The title and description give a reasonable idea of the domain (digital collaboration, metaverse, 3D scanning), but the description is truncated and doesn't fully convey specific goals or outcomes.
Simplicity	10	6	7	10%	Some technical elements (Metaverse, games engine Unreal) may reduce readability. Additionally, incorrect punctuation around the word ‘Metaverse’ slightly affects the flow of the text.	Mostly accessible language, though "Metaverse," "Unreal engine," and "3D-scanning" may be unfamiliar to non-technical, non-native English readers.
Title_clear	10	8	7	10%	The title starts with an acronym/brand name (HYBRIDLAD), which is immediately partially clarified. However, some opacity remains.	HYBRIDLAB is an unexplained acronym/brandname, though the subtitle "The Hybrid Lab" clarifies it partially. Not a standard acronym but slightly opaque.
Desc_funding	10	8	6	20%	The project’s activities and goals are clearly described, but there is no explicit mention of resource allocation.	There's a hint of purpose (digital collaboration platform using metaverse tools), but the truncation prevents full clarity on funding use.
Title_standalone	10	7	7	0%	The second part of the title (‘Creating shared designs in the Metaverse’) makes sense without the description and already exposes the project’s activities. However,	Creating shared designs in the Metaverse adds useful context, but "HYBRIDLAB" alone is not self-explanatory.

					HYBRIDLAB alone is not self-explanatory.

THRIVE - Talent Harvest: Rural Intangible Heritage and Value Empowerment

THRIVE - TALENT HARVEST: RURAL INTANGIBLE HERITAGE AND VALUE EMPOWERMENT aims to enhance the appeal of rural areas by preserving and promoting endangered intangible cultural heritage (ICH). The pr...

https://culture.ec.europa.eu/creative-europe/projects/search/details/101173661

	total	human	claude	delta	Comment human	Comment claude
Desc_EN	25	25	25	0%	The description is fully written in English.	Description is clearly written in English.
Title_EN	15	15	15	0%	The title is fully written in English.	Title is written in English.
Substantiality	20	8	15	35%	The description begins by repeating the title. This not only creates redundancy but also significantly reduces the space available for explanations. The main title of the campaign suggests that it is built around 'talent' but we have no further details about that, leading to a very vague idea of the concept. The context (rural areas) and the objective (preserving and promoting endangered cultural heritage) are clear.	The title and description together give a solid idea of the project's focus (rural areas, intangible cultural heritage preservation). However, the truncation limits visibility into specific activities or measurable objectives.
Simplicity	10	6	7	10%	The title remains abstract, as it contains three high-level concepts without a clear link between them ('talent harvest', 'rural intangible heritage', and 'value empowerment'). The second part of the description is more accessible.	Language is generally accessible, though "intangible cultural heritage" is a somewhat specialist term that may challenge non-native English readers without a background in the field.
Title_clear	10	10	6	40%	'THRIVE' is an acronym whose expansion is immediately provided ('Talent Harvest: Rural Intangible Heritage and Value Empowerment').	THRIVE is an acronym whose expansion is immediately provided ("Talent Harvest: Rural Intangible Heritage and Value Empowerment"), which is good. However, "ICH" in the description is introduced with its expansion in parentheses, so that's handled correctly. The title's full expansion is itself somewhat complex.

Desc_funding	10	6	6	0%	We know that the project 'aims to enhance the appeal of rural areas by preserving and promoting endangered intangible cultural heritage'. However, there is no information about concrete project activities or resource allocation.	The description hints at the purpose (preserving/promoting endangered cultural heritage in rural areas) but truncation prevents a full picture of how funding is specifically allocated.
Title_standalone	10	3	8	50%	The title is abstract and makes little sense without the description. It is limited to the acronym's explanation which is not built around a clear message but rather lists a series of high-level concepts.	THRIVE - Talent Harvest: Rural Intangible Heritage and Value Empowerment is fairly self-contained and communicates the project's orientation without needing the description.
	100	**73**	**82**	**9%**	**Just readable**	**Good readability**

PROSPER - PROtotype for Sustainable residencies in PERipheries

Peripheries are places of solidarity that partners in PROSPER aim to explore by creating connections between environmentally vulnerable regions, through a series of transnational cultural collabor...

https://culture.ec.europa.eu/creative-europe/projects/search/details/101100221

	total	human	claude	delta	Comment human	Comment claude
Desc_EN	25	25	25	0%	The description is fully written in English.	Description is clearly written in English.
Title_EN	15	15	15	0%	The title is fully written in English.	Title is written in English.
Substantiality	20	12	12	0%	The first sentence of the description ('Peripheries are places of solidarity') provides secondary background context. It takes up valuable space that could be used for more essential information. While it introduces the context (peripheries), this was already indicated in the title. It would have been preferable to begin the description with another key element of the project. We gain a general understanding of the project's goal (creating connections between environmentally vulnerable regions), but the explanation of specific activities is cut off before it becomes fully clear. Nevertheless, it is evident that cultural collaboration plays a role.	The title and description together suggest a cultural collaboration project focused on peripheral/vulnerable regions, but specific goals and activities remain vague, and the truncation compounds this.
Simplicity	10	8	7	10%	The vocabulary is accessible, and the language remains concrete.	Generally readable, though "peripheries," "transnational cultural collaborations," and "environmentally vulnerable regions" may pose challenges for non-native English readers with a secondary school background.
Title_clear	10	8	7	10%	'PROSPER' is an acronym whose expansion is immediately provided ('PROtotype for Sustainable residencies in PERipheries'). The unusual capitalization style to highlight the	PROSPER is an acronym and its expansion is immediately provided in the title. However, the expansion itself ("PROtotype for Sustainable residencies in PERipheries") uses an unusual capitalisation style to highlight the acronym's

					acronym's construction may slightly be confusing.	construction, which may slightly confuse readers rather than clarify.
Desc_funding	10	9	5	40%	We have a clear understanding of the context (peripheries) and the goal (creating connections between environmentally vulnerable regions). Some elements regarding resource allocation (partners) and project activities (transnational cultural collaborations) are also provided.	The description alludes to transnational cultural collaborations and connecting vulnerable regions, but is too vague and truncated to clearly convey for what specific purpose funding was allocated.
Title_standalone	10	2	7	50%	The title is limited to explaining the project's acronym which is not explicit enough to make sense.	The full title conveys a reasonable sense of the project's direction (sustainable residencies in peripheral areas), though "residencies" in this context may not be immediately clear to all readers.
	100	**79**	**78**	**1%**	**Good readability**	**Good readability**

Title_EN	15	15	15	0%	The title is fully written in English.	Title is written in English.
Substantiality	20	10	13	15%	The goal is stated, although it remains quite abstract ('strengthens social cohesion by raising environmental awareness across various stakeholders'). The explanation of concrete activities is cut off, which undermines overall understanding. The context is also vague: 'vulnerable communities' are mentioned without further detail.	The title and description together convey a reasonable picture of the project's focus (environmental awareness, social cohesion, vulnerable communities). However, "Warding Ecosystem Commons" is an unusual phrasing, and truncation again limits full visibility into specific activities.
Simplicity	10	3	6	30%	Both the title and the description include complex vocabulary (ecosystem commons), unusual constructions, and technical concepts (action-research methodology), which reduce readability.	The description contains some grammatical awkwardness ("rising the environmental awareness," "across several agents") which may hinder comprehension for non-native English readers. "Action-Research methodology" and "Ecosystem Commons" are also relatively specialist terms.
Title_clear	10	10	6	40%	The title contains an acronym that is explained.	WECARE is an acronym and its expansion is immediately provided. However, the expansion "Warding Ecosystem Commons through Action-Research & Education" is itself not straightforward — "Warding" and "Ecosystem Commons" are unusual word choices that may obscure meaning.
Desc_funding	10	8	6	20%	We are able to understand that funding will support an action-research methodology involving several agents. Some elements related to the goal are also clear: strengthening	The description gives some indication of purpose (strengthening social cohesion, environmental awareness in vulnerable communities) but remains

					social cohesion in vulnerable communities by raising environmental awareness.	vague on specific funding allocation, and truncation limits further clarity.
Title_standalone	10	3	6	30%	The title is limited to explaining the project's acronym which is not explicit enough to really make sense. 'Warding Ecosystem Commons' is an opaque phrase that reduces standalone clarity for a general audience.	The full title is somewhat self-contained but "Warding Ecosystem Commons" is an opaque phrase that reduces standalone clarity for a general audience.
	100	**74**	**77**	**3%**	**Just readable**	**Good readability**

EBA - Europe Beyond Access

Europe Beyond Access (EBA) is Europe's largest and most influential initiative to focus on the active participation of artists with disabilities in mainstream dance and theatre. Ten leading Europe...

Search - Culture and Creativity

	total	human	claude	delta	Comment human	Comment claude
Desc_EN	25	25	25	0%	The description is fully written in English.	Description is clearly written in English.
Title_EN	15	15	15	0%	The title is fully written in English.	Title is written in English.
Substantiality	20	4	16	60%	The goal is presented, but a significant amount of information space is wasted. First, the title is repeated at the beginning of the description. Second, space is used for information about the organisation that is not essential to understanding the project (the fact that it is 'is Europe's largest and most influential initiative'). As a result, we are left with only a vague understanding of the project, with no clear information about its concrete activities or involved partners (the next sentence beginning with 'Ten leading Europe…' is truncated).	The title and description together give a clear and concrete picture of the project's focus: enabling artists with disabilities to participate in mainstream dance and theatre. The description is specific and impactful, though truncation limits full visibility into activities and objectives.
Simplicity	10	9	9	0%	The phrasing is clear, and no complex vocabulary is used.	Language is clear, direct and accessible. "Mainstream dance and theatre" and "artists with disabilities" are straightforward expressions well within reach of a secondary school reader with limited English.
Title_clear	10	10	8	20%	The title contains an acronym that is explained.	EBA is an acronym and its expansion "Europe Beyond Access" is provided immediately in the title. The expansion itself is clear and evocative, though the phrase "Beyond Access" could be interpreted in more than one way without context.
Desc_funding	10	5	8	30%	The funding appears to support inclusion by promoting the active	The description clearly conveys the purpose: promoting active participation

					participation of artists with disabilities in mainstream dance and theatre. While the general context is clear, there are no specific details regarding objectives, activities, or participants.	of artists with disabilities in mainstream performing arts. This gives a strong sense of where funding is directed, despite the truncation.
Title_standalone	10	2	8	60%	The title simply explains the project's acronym, which is not explicit enough to convey a clear idea of its nature. The word 'access' may provide a slight indication, but it is not meaningful on its own.	Europe Beyond Access is a meaningful and self-contained title that communicates the project's spirit well, even without reading the description. Minor ambiguity in "Beyond Access" prevents a perfect score.
	100	**70**	**89**	**19%**	**Just readable**	**Good readability**

	total	human	claude	delta	Comment human	Comment claude
Desc_EN	25	25	25	0%	The description is fully written in English.	Description is clearly written in English.
Title_EN	15	15	15	0%	The title is fully written in English.	Title is written in English.
Substantiality	20	16	14	10%	Despite the title being quite vague, the description offers a lot of details about the project. The goal is very clearly stated. We know the what (develop knowledge, abilities and attitudes), we know the who (32 youth workers from 8 non-profit organizations) and we know the where (Lithuania, Romania, Slovakia, Estonia, Poland, Latvia, Czech Republic). Only the how is not yet known by reading the description.	The title and description together give a clear and concrete picture of the project's focus: enabling artists with disabilities to participate in mainstream dance and theatre. The description is specific and impactful, though truncation limits full visibility into activities and objectives.
Simplicity	10	9	9	0%	The description is very informative and straightforward, and it does not include complex vocabulary or structures. The title, even if quite abstract, is easily understandable.	Language is straightforward and accessible. "Youth workers," "non-profit organizations," and the country names are all easily understood by a secondary school reader with limited English.
Title_clear	10	10	9	10%	The title does not contain any acronyms.	No acronyms are present. The title is plain English, though as noted it is quite generic and not domain-specific.
Desc_funding	10	9	7	20%	We know for what purpose the funding will be used, how many actors are involved, what their activities are, and where they are located.	The description gives a reasonable sense of purpose (developing knowledge, abilities and attitudes of youth workers across multiple countries), though truncation prevents full clarity on the specific activities funded.
Title_standalone	10	2	4	20%	The title is vague and abstract. It likely refers to the project's name, but this is not entirely clear. Only the word 'future'	Capture The Future is a very generic phrase that could apply to virtually any project. It conveys no meaningful

					suggests a possible focus on youth.	information about the project's nature, sector, or objectives without reading the description.

Dream Big, Achieve More: Networking

In today's rapidly evolving world, digital skills are the key to success. Yet, many young leaders, brimming with passion and ideas, lack the knowledge to harness the power of technology. We are op...

https://erasmus-plus.ec.europa.eu/projects/search/details/2025-3-PL01-KA153-YOU-000384339

	total	human	claude	delta	Comment human	Comment claude
Desc_EN	25	25	25	0%	The description is fully written in English.	Description is clearly written in English.
Title_EN	15	15	15	0%	The title is fully written in English.	Title is written in English.
Substantiality	20	5	11	30%	The title is very generic. The description outlines a challenging context that it presumably aims to address, but it does not mention any concrete goals or activities.	The description gives a reasonable sense of the project's focus (digital skills for young leaders), but the title "Dream Big, Achieve More: Networking" is very generic and motivational in tone, adding little specific information. Truncation further limits visibility into concrete objectives and activities.
Simplicity	10	9	8	10%	The language is easy to understand and does not rely on abstract concepts or technical vocabulary. Although the description provides limited relevant information about the project, it is structurally sound and uses appropriate linking words.	Language is generally accessible and conversational. "Rapidly evolving world," "harness the power of technology" are mild clichés but within reach of a secondary school reader with limited English.
Title_clear	10	10	8	20%	The title does not contain any acronyms.	No acronyms are present. The title is plain English and easy to read, though the appended ": Networking" feels somewhat disconnected from the motivational first part, creating mild confusion about the project's actual focus.
Desc_funding	10	2	6	40%	We know almost nothing about the project. Based on the description, we can only assume that funding may be used to improve the digital skills of young leaders. However, this remains speculative.	The description hints at the purpose (equipping young leaders with digital skills) but is truncated before specific activities or funded outputs are described, limiting clarity on funding allocation.
Title_standalone	10	2	4	20%	The title is very vague. The word 'networking' is too broad	Dream Big, Achieve More: Networking is highly generic

					to convey any meaningful information about the project. “Dream Big, Achieve More” — which may be the project’s name, though this is uncertain — reads more like an appealing tagline intended to spark curiosity than an informative title	and motivational in tone. Without reading the description, it gives almost no meaningful indication of the project's sector, target group, or specific objectives.
	100	**68**	**77**	**9%**	**Just readable**	**Good readability**

Search - Erasmus+

	total	human	claude	delta	Comment human	Comment claude
Desc_EN	25	25	25	0%	The description is fully written in English.	Description is clearly written in English.
Title_EN	15	0	0	0%	The title is in Bulgarian. (Translation: Technologies and innovations in the learning process. Applications for students)	Title is written in Bulgarian, not English.
Substantiality	20	16	14	10%	The project's objectives are clearly presented (ICT innovations and digital transformation in education) as well as its activities (develop competencies in using artificial intelligence for creating creative content). The title also specifies that the project targets students.	The description (in English) gives a reasonably concrete picture of the project's focus: ICT, AI, digital transformation in education. However the title, being in Bulgarian, is inaccessible to most readers, and truncation limits full visibility into specific activities.
Simplicity	10	6	3	30%	The description contains an unexplained acronym. Apart from that, it is relatively clear, and the vocabulary remains accessible, even though the subject is somewhat technical.	The description itself is reasonably clear in English. However, per the scoring rule, since the title is not in English, the score is calculated then divided by three and rounded up. Base score: 8/10 → 8÷3 = 2.67 → rounded up = 3/10.
Title_clear	10	4	4	0%	The title does not contain any acronyms and would normally score 10. However, since it is written in Bulgarian, the /3 penalty is applied, rounded up to the next integer: 10/3 = 3.33 → 4/10	The title contains no acronyms, and is clear in its original language (it translates roughly as "Technologies and innovations in the educational process. Applications for students"). However, per the scoring rule, since the title is not in English: base score 10/10 → 10÷3 = 3.33 → rounded up = 4/10.
Desc_funding	10	8	7	10%	It's clear that the funding will be used to boost students' digital skills, particularly in using AI to create creative content. However, the specific resources to be used (materials, training, human resources...) are not specified.	The description gives a reasonable indication of purpose (developing AI and digital competencies in education), though truncation limits full clarity on specific funding allocation.

Title_standalone	10	3	4	10%	The title is clear for Bulgarian-speaking audiences and would score 8. However, since it is not written in English, the /3 penalty is applied, rounded up to the next integer: 8/3 = 2.66 → 3/10	The title is meaningful in Bulgarian and reasonably self-contained in its own language. However, per the scoring rule, since the title is not in English: base score 9/10 → 9÷3 = 3 → 3/10. Rounding up gives 4/10 as the minimum uplift from a non-zero base.
	100	**62**	**57**	**5%**	**Difficult to read**	**Difficult to read**

Search - Erasmus+

	total	human	claude	delta	Comment human	Comment claude
Desc_EN	25	25	25	0%	The description is fully written in English.	Description is clearly written in English.
Title_EN	15	15	15	0%	The title is fully written in English.	Title is written in English.
Substantiality	20	8	15	35%	The project's goal is stated in the description (empower disadvantaged VET students with AI and entrepreneurial skills linked to agri-tourism) and we also know in which countries it will be implemented. However, this goal remains quite abstract, and there is no explanation of how it will be achieved.	The title and description together give a fairly concrete picture of the project: empowering disadvantaged VET students in specific countries with AI and entrepreneurial skills linked to agri-tourism. The truncation prevents full visibility into specific activities and outputs.
Simplicity	10	1	7	60%	The description contains 2 unexplained acronyms. Some technical terms ('agri-tourism') also reduce the accessibility of the text.	Generally accessible language, though "VET students" is an unexplained acronym in the description, and "agri-tourism" and "digital inclusion" may be mildly challenging for non-native English readers with a secondary school background.
Title_clear	10	8	6	20%	The title contains 1 unexplained acronym ('AI'). However, this is relatively widely understood.	AI is a widely understood abbreviation and can reasonably be considered self-explanatory in today's context. However, "AI Bridge" as a project name is somewhat metaphorical and its meaning is not immediately obvious. No parenthetical explanation is provided for "AI" in the title.
Desc_funding	10	5	8	30%	A general funding purpose is indicated (supporting disadvantaged VET students with AI and entrepreneurial skills) but there are no details on how the funding will be used.	The description gives a clear sense of purpose: empowering disadvantaged VET students with AI and entrepreneurial skills in the context of agri-tourism, and strengthening digital inclusion. This communicates funding purpose well despite truncation.

Title_standalone	10	2	7	50%	The title is very abstract and somewhat metaphorical. It also includes technical vocabulary.	AI Bridge: Europe's agri-tourism gateway is reasonably self-contained and gives a meaningful indication of the project's domain and geographic scope, though "Bridge" is metaphorical and "gateway" adds slight redundancy.
	100	**64**	**83**	**19%**	**Difficult to read**	**Good readability**

Ubuntu Leaders Academy in Europe

O projeto ULA@EU – Academia de Líderes Ubuntu na, Europa um projeto do IPAV – Instituto Padre António Vieira, surgiu com o objetivo estratégico de internacionalização do método Ubuntu e de increme...

https://erasmus-plus.ec.europa.eu/projects/search/details/2020-1-PT01-KA104-078114

	total	human	claude	delta	Comment human	Comment claude
Desc_EN	25	0	0	0%	The description is written in Portuguese. (Translation: The ULA@EU project – Ubuntu Leaders Academy in Europe, a project of IPAV – Instituto Padre António Vieira, was created with the strategic objective of internationalizing the Ubuntu method and increas…)	Description is written in Portuguese, not English.
Title_EN	15	15	15	0%	The title is fully written in English.	Title is written in English.
Substantiality	20	4	8	20%	The project's goal is briefly mentioned at the end of the description. The description begins with two consecutive acronym explanations, which significantly undermines readability and wastes valuable space. Moreover, one of the acronyms is already spelled out in the title. Very little is known about the project itself (no indications about activities, stakeholders, etc.).	The title and description together give a fairly concrete picture of the project: empowering disadvantaged VET students in specific countries with AI and entrepreneurial skills linked to agri-tourism. The truncation prevents full visibility into specific activities and outputs.
Simplicity	10	1	4	30%	The double acronym explanation at the beginning of the description is poorly constructed and affects comprehension. Additionally, the description is not written in English, which triggers the /3 penalty. The initial score would have been 2/10. 2/3 = 0.66 → 1/10	The description is in Portuguese. Base score for readability of the description in its own language would be moderate (6/10), as it contains institutional jargon ("internacionalização do método Ubuntu") and an unexplained acronym (IPAV). Per the scoring rule, since the description is not in English: 6÷3 = 2 → rounded up = 2/10. However the title is in English and simple, partially compensating. Blended score: 4/10.
Title_clear	10	10	8	20%	The title does not contain any acronyms.	The title is in English and contains no unexplained

						acronyms. "Ubuntu" is a cultural/philosophical concept that may not be universally known but is increasingly recognised. The title is otherwise clear and readable.
Desc_funding	10	1	2	10%	Only a very vague funding purpose is mentioned (strategic objective of internationalizing the Ubuntu method). As the description is not written in English, the /3 penalty is applied. The initial score would have been 3/10: 3/3 = 1/10	The description is in Portuguese. Base score for funding clarity is low (4/10) as the truncated Portuguese text only vaguely alludes to the strategic internationalisation of the Ubuntu method. Per the scoring rule: 4÷3 = 1.33 → rounded up = 2/10.
Title_standalone	10	3	7	40%	The title simply states the project's name, which is not explicit enough to convey a clear idea of its nature. Only the word 'Ubuntu' provides a slight indication of the project's focus.	Ubuntu Leaders Academy in Europe is reasonably self-contained and conveys the project's nature (a leadership academy, European scope, Ubuntu philosophy), though "Ubuntu" may not be immediately meaningful to all readers.

If we consider all the criteria deltas between the human and Claude's assessments of the 10 samples, we observe an average delta of 17%.

Perfect alignment (0%)

There is perfect alignment on some criteria: **Desc_EN** and **Title_EN**. This means there is no difference at all between human and LLM assessments for these fields. This can be explained by the binary nature of these criteria.

Moderate divergence (19%-23%)

Most criteria fall within a relatively tight range, with an average delta between 19% and 23% (**Substantiality, Desc_funding, Simplicity, and Title_clear**). A large part of this divergence can be explained by a few differences in approach:

Substantiality

The human assessment applied penalties when title and description were repeating each other or when space was used for secondary information (like background elements).

Claude applied penalties when information was cut off due to truncation, whereas the human assessment tended to consider the meaning of the information, even when it was only partially presented (but from which the intended meaning could be inferred). This suggests that the LLM is more sensitive to incomplete inputs, while the human assessment compensates for missing information through inference.

Title_clear

The human assessment followed the prompt more strictly and based its score solely on the use of acronyms, whereas the LLM also included a qualitative evaluation of the title. However, this created some overlap with the Title_standalone criterion.

In addition, the LLM sometimes incorporated elements from the description into its assessment for this criterion, which is a clear deviation from the prompt.

Example: *THRIVE is an acronym whose expansion is immediately provided ("Talent Harvest: Rural Intangible Heritage and Value Empowerment"), which is good. However, "ICH" in the description is introduced with its expansion in parentheses, so that's handled correctly. The title's full expansion is itself somewhat complex.)* (**text sample 2**)

Simplicity

The rule related to the /3 penalty was not correctly applied by the LLM in both text sample 8 and text sample 10:

- *However, per the scoring rule, since the title is not in English, the score is calculated then divided by three and rounded up. Base score: 8/10 → 8÷3 = 2.67 → rounded up = 3/10.* (**text sample 8**)
- *Per the scoring rule, since the description is not in English: 6÷3 = 2 → rounded up = 2/10. However the title is in English and simple, partially compensating. Blended score: 4/10.* (**text sample 10**)

We can also observe that, in some cases, both the human and the LLM provide quite similar justifications but assign very different scores, as in **text sample 9**:

- Human (1/10): *The description contains 2 unexplained acronyms. Some technical terms ('agri-tourism') also reduce the accessibility of the text.*
- Claude (7/10): *Generally accessible language, though "VET students" is an unexplained acronym in the description, and "agri-tourism" and "digital inclusion" may be mildly challenging for non-native English readers with a secondary school background.*

Desc_funding

Similarly, both the human and the LLM sometimes provide comparable justifications but assign very different scores, as in **text sample 7**:

- Human (2/10): *We know almost nothing about the project. Based on the description, we can only assume that funding may be used to improve the digital skills of young leaders. However, this remains speculative.*
- Claude (7/10): *The description hints at the purpose (equipping young leaders with digital skills) but is truncated before specific activities or funded outputs are described, limiting clarity on funding allocation.*

Biggest disagreement (33%)

Title_standalone stands out clearly. This can be explained by two main factors.

First, as mentioned earlier, the LLM tends to overlap the criteria Title_clear and Title_standalone, whereas the human assessment evaluates only the standalone quality of the title in this criterion.

Second, the human assessment places significant importance on clarity, penalising titles that are vague, generic, or not explicit, whereas the LLM is generally more permissive in this regard.
